

# Eduardo Trevino

edutrecompute@gmail.com ❖ (956) 261-9316 ❖ Mercedes, TX

Software Developer with 1 Y.O.E, advanced knowledge of JavaScript/SPAs. Interested in: web development, automation, & AI. Seeking a full-time role in software development (frontend, backend, or full stack) or QA engineering/testing with an organization that values team-building, stimulating work, and developer productivity

## WORK EXPERIENCE

### **DataLogic Inc Apr, 2025 – Present**

*Software Developer, Harlingen, TX*

- Enhanced user experience by adding loading animations and hover states to high-traffic UI components
- Resolved frontend issues including layout bugs, typographic errors, and inconsistent theming across components

### **DataLogic Inc Apr, 2022 – 2025**

*Software Tester, Harlingen, TX*

- Engineered first-of-its-kind infrastructure used to run our automated test suite and wrote automated tests which accounted for 85% of the test suite leading to reliable test coverage of every project in the company's ecosystem
- Designed key UX improvements that made the web interface more intuitive for around 10,000 users, resulting in fewer customer service calls

## PROJECTS

### **Rarelygroovy.com – Jan, 2023 – Present**

*Full Stack Developer | Personal Hobby Project*

- Implemented NgRx into the web application enabling crucial user experience features like app rehydration, user accounts, in-app payments, in-app subscription management, and responsive form inputs
- Optimized API endpoints using techniques like DTOs and lazy evaluation to reduce project cloud spend by approximately 20% month over month
- Devised a CI/CD pipeline through GitHub Actions, automating the testing process at each commit and the deployment of build artifacts leading to enhanced code quality and a streamlined deployment process

### **Rarelygroovy Mobile App – Feb 2025 – Present**

*Full Stack Developer | Personal Hobby Project*

- Reduced average event entry time from an average of 3 minutes to 20 seconds by architecting modular SwiftUI components like date pickers and auto-complete text fields
- Optimized event rendering and filtering using offloaded filter logic and LazyVStack to effectively handle a 40x increase in data
- Added upsell overlays to gated features, increasing visibility of paid content and driving a measurable uptick in paywall impressions and conversion opportunities

## EDUCATION

**University of Texas Rio Grande Valley, Dec 2021. BS, Computer Science GPA 3.6/4.0**

## SKILLS

- **Frontend:** Angular (PrimeNG, Angular Material), Bootstrap, CSS, HTML
- **Backend & Frameworks:** Express, Node.js, RxJs, NgRx, .NET
- **Testing & QA:** Experienced in automated end-to-end testing with Playwright, plus QA best practices
- **CI/CD:** GitHub Actions, GitHub Workflows
- **Databases:** SQL Server, MongoDB
- **Soft Skills:** Technical communication, mentoring, teaching, creative problem-solving, resilience
